Secondary School Examination February - 2025
SUBJECT NAME: Social Science SUBJECT CODE 087 PAPER CODE 32/5/2

General Instructions: -

1. You are aware that evaluation is the most important process in the actual and correct assessment of the candidates. A small mistake in evaluation may lead to serious problems which may affect the future of the candidates, education system and teaching profession. To avoid mistakes, it is requested that before starting evaluation, you must read and understand the spot evaluation guidelines carefully.
2. **“Evaluation policy is a confidential policy as it is related to the confidentiality of the examinations conducted, Evaluation done and several other aspects. Its’ leakage to public in any manner could lead to derailment of the examination system and affect the life and future of millions of candidates. Sharing this policy/document to anyone, publishing in any magazine and printing in News Paper/Website etc. may invite action under various rules of the Board and IPC.”**
3. Evaluation is to be done as per instructions provided in the Marking Scheme. It should not be done according to one’s own interpretation or any other consideration. Marking Scheme should be strictly adhered to and religiously followed. **However, while evaluating, answers which are based on latest information or knowledge and/or are innovative, they may be assessed for their correctness otherwise and due marks be awarded to them. In Class-X, while evaluating two competency-based questions, please try to understand given answer and even if reply is not from marking scheme but correct competency is enumerated by the candidate, due marks should be awarded.**
4. The Marking scheme carries only suggested value points for the answers. These are in the nature of Guidelines only and do not constitute the complete answer. The students can have their own expression and if the expression is correct, the due marks should be awarded accordingly.
5. The Head-Examiner must go through the first five answer books evaluated by each evaluator on the first day, to ensure that evaluation has been carried out as per the instructions given in the Marking Scheme. If there is any variation, the same should be zero after deliberation and discussion. The remaining answer books meant for evaluation shall be given only after ensuring that there is no significant variation in the marking of individual evaluators.
6. Evaluators will mark (✓) wherever answer is correct. For wrong answer CROSS ‘X’ be marked. Evaluators will not put right (✓) while evaluating which gives an impression that answer is correct and no marks are awarded. **This is most common mistake which evaluators are committing.**
7. If a question has parts, please award marks on the right-hand side for each part. Marks awarded for different parts of the question should then be totaled up and written in the left-hand margin and encircled. This may be followed strictly.
8. If a question does not have any parts, marks must be awarded in the left-hand margin and encircled. This may also be followed strictly.
9. If a student has attempted an extra question, answer of the question deserving more marks should be retained and the other answer scored out with a note **“Extra Question”**.
10. No marks to be deducted for the cumulative effect of an error. It should be penalized only once.
11. A full scale of marks _____80_____ (example 0 to 80/70/60/50/40/30 marks as given in Question Paper) has to be used. Please do not hesitate to award full marks if the answer deserves it.
12. Every examiner has to necessarily do evaluation work for full working hours i.e., 8 hours every day and evaluate 20 answer books per day in main subjects and 25 answer books per day in other subjects (Details are given in Spot Guidelines).
13. Ensure that you do not make the following common types of errors committed by the Examiner in the past:- Giving more marks for an answer than assigned to it.

	<ul style="list-style-type: none"> • Wrong totaling of marks awarded on an answer. • Wrong transfer of marks from the inside pages of the answer book to the title page. <p>Wrong question wise totaling on the title page.</p> <ul style="list-style-type: none"> • Leaving answer or part thereof unassessed in an answer book. • Wrong totaling of marks of the two columns on the title page. • Wrong grand total. • Marks in words and figures not tallying/not same. • Wrong transfer of marks from the answer book to online award list. • Answers marked as correct, but marks not awarded. (Ensure that the right tick mark is correctly and clearly indicated. It should merely be a line. Same is with the X for incorrect answer.) • Half or a part of answer marked correct and the rest as wrong, but no marks awarded.
14.	While evaluating the answer books if the answer is found to be totally incorrect, it should be marked as cross (X) and awarded zero (0) Marks.
15.	Any un assessed portion, non-carrying over of marks to the title page, or totaling error detected by the candidate shall damage the prestige of all the personnel engaged in the evaluation work as also of the Board. Hence, in order to uphold the prestige of all concerned, it is again reiterated that the instructions be followed meticulously and judiciously.
16.	The Examiners should acquaint themselves with the guidelines given in the “ Guidelines for spot Evaluation ” before starting the actual evaluation.
17.	Every Examiner shall also ensure that all the answers are evaluated, marks carried over to the title page, correctly totaled and written in figures and words.
18.	The candidates are entitled to obtain photocopy of the Answer Book on request on payment of the prescribed processing fee. All Examiners/Additional Head Examiners/Head Examiners are once again reminded that they must ensure that evaluation is carried out strictly as per value points for each answer as given in the Marking Scheme.

22	<p>Describe any two main characteristics of ‘Alluvial Soil’.</p> <ul style="list-style-type: none"> (i) These have been deposited by three important Himalayan river systems– the Indus, the Ganga and the Brahmaputra. (ii) The alluvial soil consists of various proportions of sand, silt and clay. (iii) As we move inlands towards the river valleys, soil particles appear somewhat bigger in size. (iv) In the upper reaches of the river valley i.e. near the place of the break of slope, the soils are coarse, commonly found in piedmont plains such as Duars, Chos and Terai. (v) According to their age alluvial soils can be classified as old alluvial (Bangar) and new alluvial (Khadar). (vi) The bangar soil has higher concentration of kanker nodules than the Khadar. It has more fine particles and is more fertile than the bangar. (vii) Mostly these soils contain adequate proportion of potash, phosphoric acid and lime, ideal for the growth of sugarcane, paddy, wheat and other cereal and pulse crops. 	7 G	2X1=2

30	<p>(a) How did the tension in Balkans region in 1871 become the major cause of the First World War? Explain.</p> <ul style="list-style-type: none"> (i) The most serious source of nationalist tension in Europe after 1871 was the area called the Balkans. (ii) The Balkans was a region of geographical and ethnic variation comprising modern-day Romania, Bulgaria, Albania, Greece, Macedonia, Croatia, Bosnia-Herzegovina, Slovenia, Serbia and Montenegro whose inhabitants were broadly known as the Slavs. (iii) A large part of the Balkans was under the control of the Ottoman Empire. (iv) The spread of the ideas of romantic nationalism in the Balkans together with the disintegration of the Ottoman Empire made this region very explosive. (v) All through the nineteenth century the Ottoman Empire had sought to strengthen itself through modernisation and internal reforms but with very little success. (vi) One by one, its European subject nationalities broke away from its control and declared independence. 	5 H	5X1=5

	<p>(vii) The Balkan people based their claims for independence or political rights on nationality.</p> <p>(viii) They used history to prove that they had once been independent but had subsequently been subjugated by foreign powers.</p> <p>(ix) Hence the rebellious nationalities in the Balkans thought of their struggles as attempts to win back their long-lost independence.</p> <p>(x) As the different Slavic nationalities struggled to define their identity and independence, the Balkan area became an area of intense conflict.</p> <p>(xi) The Balkan states were fiercely jealous of each other.</p> <p>(xii) Each of them hoped to gain more territory at the expense of the others.</p> <p>(xiii) Matters were further complicated because the Balkans also became the scene of big power rivalry.</p> <p>(xiv) During this period, there was intense rivalry among the European powers over trade and colonies as well as naval and military might.</p> <p>(xv) These rivalries were very evident in the way the Balkan problem unfolded.</p> <p>(xvi) Each power – Russia, Germany, England, Austro-Hungary – wanting to get hold of other powers over the Balkans, and extending its own control over the area.</p> <p>(xvii) This led to a series of wars in the region and finally the First World War.</p> <p>(xviii) Any other relevant point.</p> <p style="text-align: center;">To be assessed as a whole.</p> <p style="text-align: center;">OR</p> <p>(b) Explain the programme for a unified Italian republic put forward by the Giuseppe Mazzini in the decade of 1830.</p> <p>(i) An Italian revolutionary Giuseppe Mazzini, born in Genoa in 1805, became a member of the secret society of the Carbonari.</p> <p>(ii) During the 1830s, he had sought to put together a coherent programme for a unitary Italian Republic.</p> <p>(iii) He was sent into exile in 1831 for attempting a revolution in Liguria.</p>	<p>12,20-21H</p>	<p>5X1=5</p>

5X1=5

- (i) Sustainable development refers to meeting the needs of the present without compromising the needs of the future generations.
- (ii) With growing population and growing demands for resources sustainability is becoming challenging in the present time.
- (iii) Consequences of environmental degradation do not respect national or state boundaries. Sustainability is a global issue and requires global co-operation.
- (iv) Promoting sustainable industrialization can ensure resource efficiency and long-term economic growth.
- (v) Eco-friendly technologies drive economic growth while protecting the environment. More government policy support can help ensure sustainability.
- (vi) Lifestyle changes are leading to overconsumption. Public awareness and responsible consumption can contribute to long-term sustainability.
- (vii) Advancing alternative energy like solar and wind power reduces dependence on fossil fuels.
- (viii) Strengthening environmental policies and regulations helps control pollution and preserve ecosystems.
- (ix) Encouraging afforestation and biodiversity conservation supports ecological balance.
- (x) Investing in sustainable agriculture ensures food security while conserving natural resources.

(a) Study the given flow chart and answer the question that follows:

60 G

5X1=5

Explain the added value product in the textile industry on the bases of above flowchart.

- (i) Cotton is harvested from cotton plants and processed to remove seeds and impurities. The raw fibre obtained is the initial stage of value addition.
- (ii) The raw cotton fibre is spun into yarns through various spinning techniques. It enhances the usability of cotton by making it suitable for weaving or knitting.
- (iii) The spun yarn is woven or knitted to create fabric. This step transforms the material into a more functional form, adding value by making it suitable for further processing.
- (iv) The fabric undergoes dyeing, printing, and finishing processes to improve its aesthetic appeal, durability, and texture. This increases the fabric's market value and makes it ready for garment production.
- (v) The finished fabric is cut and stitched into garments such as shirts, dresses, or jeans making it ready for consumers.
- (vi) Cotton industry, by creating demands supports many other industries, such as chemicals and dyes.

Explain the steel manufacturing process on the bases of the above flowchart.

- (i) Raw materials like iron ore, coal, and limestone are transported to the steel plant. (Example: Iron ore from mines in India (like Odisha or Jharkhand) is transported to steel plants).

	<p>(ii) The raw materials are fed into a blast furnace, where they are melted at high temperatures. (Example: In steel plants, coke is used as fuel to melt iron ore).</p> <p>(iii) The molten iron extracted from the blast furnace is called pig iron, which is high in carbon content and not yet steel. (Example: Pig iron is used for refining steel).</p> <p>(iv) The pig iron is processed in steel-making furnaces to reduce impurities and adjust its composition. (Example: Companies produce different grades of steel for various industrial uses).</p> <p>(v) The purified steel is then shaped into desired forms like sheets, rods, or beams through rolling, forging, or casting. 36	<p>Read the following source carefully and answer the questions that follow:</p> <p>Pages of Gutenberg's Bible, the first printed book in Europe.</p> <p>Gutenberg printed about 180 copies, of which no more than 50 have survived.</p> <p>Look at these pages of Gutenberg's Bible carefully. They were not just products of new technology. The text was printed in the new Gutenberg press with metal type, but the borders were carefully designed, painted and illuminated by hand by artists. No two copies were the same. Every page of each copy was different. Even when two copies look similar, a careful comparison will reveal differences. Elites everywhere preferred this lack of uniformity: what they possessed then could be claimed as unique, for no one else owned a copy that was exactly the same.</p> <p>In the text you will notice the use of colour within the letters in various places. This had two functions: it added colour to the page, and highlighted all the holy words to emphasise their significance. But the colour on every page of the text was added by hand. Gutenberg printed the text in black, leaving spaces where the colour could be filled in later.</p> <p>36.1 Mention the contribution of Gutenberg in the field of printing.
